Amazingly compact, full plastic diaphragm valve, with orientable 90° air inlet connections and optimized internal design to cope with the most demanding applications.

Operational life exceeding 1 million cycles\* to ensure the highest number of maintenance-free operations.

- **90° orientable compressed air inlets** to align connections to the pipeline or specific plant configuration.
- **Anti-unscrewing system** to prevent piston rotations, minimizing diaphragm distortion, and ensuring a long lifetime service with no maintenance.

(\* Laboratory tests)

**Enhanced effectiveness of the external sealing system thanks to a circular integrated rib**
